MEETING

« Factory chimneys from here and Europe »

Factory chimneys enthusiasts : at the core of their motivations

Coordinated by LE NON-LIEU / EFAITH / Vlaamse Vereniging voor Industriële Archeologie / Asociación en Defensa de las Chimeneas y el Patrimonio Industrial de Málaga

Contributions of factory chimneys enthusiasts, activists, european experts and elected officials / advice for chimney owners and for politicians /close cooperation between associations / visits to sites in the making.

There is a diversity among the activists and enthusiasts of factory chimneys : common citizens, experts, and European officials are invited to present what led them to commit themselves to the preservation and enhancement of factory chimneys. The objective of this fourth factory chimney meeting is to go to the core of the motivations of the chimney lovers and to understand the process by which factory chimneys become heritage. The contributions will be put online and will provide an information base and a source of inspiration for participants and everyone else in Europe.

Furthermore, the objective of the meeting is to inform you what you should know and what you can do if you are a citizen alerted by a chimney-destruction project, an owner of a site where there is a factory chimney that is damaged, a civil servant or elected official of a community with one or more factory chimneys, expert in heritage, town planning or civil engineering who must give an opinion on a factory chimney.
